# Gawler Town Centre Structure Plan sets direction for Gawler's future

The Town of Gawler has finalised its Gawler Town Centre Structure Plan, setting a long-term direction for a vibrant, connected and welcoming Town Centre that supports Gawler's growth while celebrating its unique identity.

The Plan provides a framework to guide future development and investment, with a focus on strengthening the Town Centre as the "Heart of the Region".

It identifies opportunities to create more attractive and active public spaces, improve connections for pedestrians, cyclists and vehicles, support local businesses and investment, and enhance the Town Centre's role as a destination for retail, hospitality, culture, events and community activity.

The Plan also places a strong emphasis on protecting and celebrating Gawler's heritage and character, ensuring future change builds on the qualities that make the Town Centre distinctive.

A supporting Development Delivery Framework will also be finalised to help identify and prioritise implementation opportunities over the next decade.

The final Gawler Town Centre Structure Plan and Community Engagement Outcomes Report are now available to view via Your Voice Gawler.

**Quote attributable to Mayor Nathan Shanks:**
Gawler is growing, and our Town Centre needs to grow with it. The Structure Plan provides an opportunity to support new investment and development while ensuring the heritage, character and sense of place that our community values remain at the heart of its future.

This is a long-term vision, and its implementation will take time, but it gives us a strong foundation to progressively deliver improvements and create a Town Centre we can all be proud of.

**Quote attributable to CEO Chris Cowley:**
The Structure Plan gives Council, the community and potential investors greater clarity about the future direction of the Town Centre.

It provides a framework for coordinated investment and renewal, while allowing opportunities to be considered as they arise and priorities change over time.
