

Timber Shade Structure

Timber structure that serves as a meeting point for families and visitors, provides shaded spot to sit and relax

Picnic Table/ Bench x2

Park picnic tables are durable and versatile outdoor furniture pieces designed to provide a comfortable and inviting space for individuals and groups to gather, eat, and relax in the park.

Music Walls x2

Interactive wall featuring a variety of tactile and auditory elements that invite users to create music by touching, tapping, or manipulating different objects on the wall's surface to explore and experiment with sound in a visually engaging way

Monkey Bars

Monkey bars are a classic and popular playground equipment providing a challenging and adventurous physical activity for children. They offer an opportunity for kids to improve their strength, coordination, and motor skills while having fun

Rock Carving Bowls x2

Carved bowls are great for mixing and grinding loose plant materials or small rocks and stones. Bowls are located in the quarry

Leaping Logs

Leaping logs is an exciting and challenging ninja course equipment where individuals navigate a series of elevated and low logs

Basketball Court

A compact and versatile space for basketball enthusiasts to practice shooting, dribbling, and playing small-sided games, making it ideal for limited space areas or individual training sessions.

Basket Swing

A large basket swing big enough to accommodate even adults. Users will be able to enjoy the thrilling swinging sensation

Double Bay Swing

A double bay swing offers a unique and versatile outdoor play experience. It combines the enjoyment of traditional swinging with the added thrill of a basket swing, providing a play element for multiple users

Double Timber Platform Tower

Two timber towers connect via a footbridge. Around the tower are varying climbing elements. At the peak of the tower is a helix slide or a slide pole for quick exits. Tall timber platform contains a skillion roof and a net platform cubby on it's lowest level for hideout and leisure.

Log Scramble (A)

A log scramble is an engaging and challenging playground feature that consists of a series of logs or tree stumps arranged in a haphazard manner, creating an obstacle course-like structure. Children can navigate their way through with problem solving and risk-taking

Log Scramble (B)

A challenging log scramble formed in a circular shape in which users choose their own path along the obstacle. It is physically as well as mentally challenging to navigate through. This scramble features a net crossing and rope traverse

Tumble Bar & Rope Balance

Rope attachments to the scramble for additional challenges further enhancing users gross motor skills

Notched Posts

Timber posts with notched foot holds for weaving through the space

Net Crossing

Net crossing offers another layer of difficulty to the log scramble as adds an element of unpredictability due to it wobbling, children will learn about problem solving, level up their gross motor skills as well as engage in thier imagination

### Angled Mound Net

The angle net gives the mound a greater opportunity to engage users, the angle alludes more to a crawling type movement activating different muscles. The weight of the user in combination with the nets close proximity to the ground makes this quite the challenge

### Low Balance Logs

A series of horizontal logs placed close to the ground, providing a fun and engaging balance obstacle for children.

### Mound Slide

Nestled on the side of a mound, this slide allows users to quickly get down the sloping terrain. Children can do many loops of this before they are even tired

### Flying Fox

A thrilling and exhilarating playground element that allows participants to fly through the air at top speeds! Users will experience a rush of adrenaline as they soar through the space

### Log Jumpers

Logs at varying heights and distances provide a challenge for users who are into their parkour

### Kitchen

A timber workspace to further provoke imaginative, experimental and creative play

### Mound Rocks

The mound rocks can be used to balance or climb across and traverse up or down the mound. The rocks offer a low-risk balance or climbing challenge for all ages. The organic shape improves critical risk taking and body awareness

### Tumble Bars

Tumble Bar – a combination of gross motor skills that focus on upper body and core strength

### Native Garden

Native plantings provide greenery, offering interaction with nature while creating a calm environment. Local native plants for the park include Chalk Sticks, Aloe Andrea's Orange & Lomandra Limetuff.

### Perimeter Fence

The rural style timber fence with timber posts and wire mesh encloses the space in an affordable manner, offering protection from dogs in the park while in keeping with the theme. The fence can be used to grow creepers or vines to green the space and screen the fencing.

### Seating Log

Seating logs placed around the cultural area offer a spot to relax under the tree and observe. A seating log is placed toward the basketball court for watching a game or resting.

### Disposal Bins

Disposal of waste such as trash and recyclables. It helps keep the environment clean and encourages responsible waste disposal among park visitors
